BLUESPOON(TM) AX - new wireless headset press release

Bluespoon(TM) AX is an all new construction and the smallest wireless production headset yet to be released from Nextlink.to. The 4.2cm long headset features Bluetooth(R) Headset and Handsfree profiles for optimal compatibility.

NEW features:

- 3 button interface - 2 sidebuttons and one large topbutton.
- User exchangeable battery - Coin cell battery type.
- Left and Right ear usage - exchangeable soft backpieces with integrated soft springs.
- Soft springs can be cut by user for that perfect fit.
- Mini USB charging port - charge via computer's USB port using the supplied USB cable.
- Unique carrying strap system is also supplied in retail package.

Bluespoon(TM) AX will be available in Q4.

Images, colours and complete technical specifications will be available soon on the website.

Carrying strap

User's Guide

Bluespoon™ AX is the newest analog Bluetooth® headset from Nextlink.to, and the successor to the Bluespoon™ Chameleon. Bluespoon™ AX is a completely new construction and very different from previous Bluespoon™ headsets.

DESIGN:

Design is very dynamic and Bluespoon™ AX is also smaller than previous Bluespoon™ headsets.

SIMPLE EASY-TO-USE 3-BUTTON INTERFACE:

A large multifunctional button called TALK is placed on top of the headset, and two smaller buttons are placed on the sides of the headset.

COMPLETELY REDESIGNED BACKPIECE:

Bluespoon™ AX can be used in both left and right ear, due to its turnable backpieces. On Bluespoon™ AX the speakerpart and soft spring are built into one unit, which we call a backpiece. The soft springs can be cut by the user, to fit perfectly. Backpieces come in two versions, one with a short speakerpart (the part that goes into the ear canal) and one with a longer speakerpart. One of each is supplied in the retail package.

PAIRING:

Bluespoon™ AX can be paired with 8 different Bluetooth® devices.

Bluespoon™ AX will be available in Q4 2004.
